

Year 2 and 3 homework Friday 25th September

1. Reading at home. Please read 3 x weekly and write in your child's reading record (even a quick signature if you are busy). I love to hear about all the reading, so please share more than just schoolbooks if you can.
2. TTRS/Numbots. By the end of this week, all children will have come home with a letter explaining about this programme and their login. I have indicated at the top of the sheet which one your child should use. There will also be a login sticker in the corner of their reading record. Every Friday, certificates are given in assembly to those who have accessed it the most.
3. Maths: This term we focus mainly on place value up to 100/1,000. This week we have been focused on 1/10/100 more and less. Some children are able to do this mentally, but for the most part we have been using place value charts and counters.

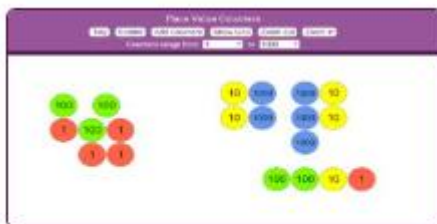

E.g.

Hundreds	Tens	Ones
		

Please practice this at home, if you would like to use online counters, I recommend:

<https://mathsbot.com/>

- Manipulatives
- Place value counters

Place Value Counters

Steps to success:

1. Make a number (2 digit or 3 digit)
2. What is 1 more? 10 more? 100 more?
3. What is 1 less? 10 less? 100 less?

As this is a letter going out to everyone, I have not noted down specific children, but if you would like advice on where your child is working within the number system, please see me or pop me an email. Generally, Y2s up to 100 and Y3s up to 1,000. However some children are able to understand the higher numbers, and some need more support with lower numbers.
